Kee
BUSINESS SERVICES

BUSINESS CONNECTIVITY

BUILT FOR BUSINESS

Business Broadband

Fast, reliable broadband on a business only network, with a real person at Kee when you need help.

Business broadband built for offices and home workers, ready for cloud apps, video calls and IP telephony, on a network that isn't crowded by consumer traffic.

- **Full fibre** where available
- **No phone line needed** with SoGEA
- **Voice ready** for your phone system

WHY BUSINESS BROADBAND

Your business runs on its connection.

Cloud apps, video calls, card payments and your phones all depend on your internet. Business broadband runs on a network built only for businesses, so it isn't slowed down by home streaming at peak times, and it comes with UK based support and faster fix options.

Offices | **Home workers** | **Retail** | **Professional services** | **Creative studios** | **Multi site**

Business only

No crowding from consumer traffic.

Voice ready

Built for IP phones and video.

Faster fixes

Business Care maintenance options.

WHO IT'S FOR

Business broadband is a smart move if you:

Rely on the cloud
Apps, files and backups online.

Make calls online
Hosted phones, Teams or SIP.

Still pay line rental
For a phone line you don't use.

Upload big files
Designers, video and creative teams.

Have home workers
Who need a business grade line.

Are growing
More people, more devices, more data.

THE OPTIONS

The right connection for every site.

Full fibre (FTTP)

Fibre all the way to your premises. You get the speed you pay for, not an “up to” speed, with speeds up to 1 Gbps.

SoGEA

Broadband without a phone line, so no line rental, at up to 80 Mbps. Available to around 90% of UK premises, quick to install and ready for hosted phones.

Symmetric full fibre

Equal upload and download speeds, from 160 Mbps up to 2.5 Gbps where available, ideal for cloud, video and large files.

Converged broadband

A router set up to put voice first, so calls on your hosted phone system or SIP trunks stay clear.

Leased lines

A dedicated fibre connection for larger and multi site businesses where data is business critical.

Business Care

Upgrade your maintenance for an even faster fix time if something goes wrong.

BUSINESS GRADE

Connectivity you can depend on.

- Business only network
- UK based support
- Resilient network
- Faster fix options
- Ready for 2027

READY FOR THE SWITCH OFF

Move off copper before the 2027 switch off.

The old analogue phone network is being switched off, with the deadline set for January 2027. Broadband that relies on a phone line needs to move to SoGEA or full fibre. We check what's available at your address and plan the move for you.

Check availability

We check every option at your address.

Switch over

From old broadband to SoGEA or fibre.

Keep calls clear

Converged options for your phone system.

Lose line rental

No phone line to pay for with SoGEA.

CHOOSING THE RIGHT SPEED

Small office, big office or multi site

Up to 10 people on one site usually suits FTTP or SoGEA. Up to 50 people across one or two sites usually suits FTTP or a leased line. Larger businesses with heavy data, video and voice usually need a dedicated leased line. We'll recommend what fits, not the most expensive.

WHY USE KEE

We make getting connected simple.

One point of contact

A real person at Kee who knows your business.

Honest advice

The right speed for how you work.

Joined up

Alongside your phones, mobiles and payments.

Managed move

We handle the order and the install.

HOW IT WORKS

1. **Book a meeting**
   Tell us how your business works.
2. **Availability check**
   We check every option at your address.
3. **Recommend**
   The right connection and speed.
4. **Install**
   We manage the order and go live.

GETTING STARTED

Three easy ways to get started.
