PRODUCT SHEET

Business Broadband

Full fibre, SoGEA, symmetric fibre and leased lines on a business only network, ready for cloud apps, video and voice.

THE OPTIONS

Full fibre (FTTP)
Fibre all the way to your premises. You get the speed you pay for, not an “up to” speed, with speeds up to 1 Gbps.

SoGEA
Broadband without a phone line, so no line rental, at up to 80 Mbps. Available to around 90% of UK premises, quick to install and ready for hosted phones.

Symmetric full fibre
Equal upload and download speeds, from 160 Mbps up to 2.5 Gbps where available, ideal for cloud, video and large files.

Converged broadband
A router set up to put voice first, so calls on your hosted phone system or SIP trunks stay clear.

Leased lines
A dedicated fibre connection for larger and multi site businesses where data is business critical.

Business Care
Upgrade your maintenance for an even faster fix time if something goes wrong.

WHO IT’S FOR

Rely on the cloud
Apps, files and backups online.

Make calls online
Hosted phones, Teams or SIP.

Still pay line rental
For a phone line you don’t use.

Upload big files
Designers, video and creative teams.

Have home workers
Who need a business grade line.

Are growing
More people, more devices, more data.

READY FOR THE SWITCH OFF

Check availability
We check every option at your address.

Switch over
From old broadband to SoGEA or fibre.

Keep calls clear
Converged options for your phone system.

Lose line rental
No phone line to pay for with SoGEA.
