BUSINESS SERVICES

FACT SHEET

Commercial Solar Panels

On site solar power designed around how your business uses energy, with funding options including no upfront cost.

AT A GLANCE

WHAT IT IS **On site solar power for your business**	WHERE **Rooftops, ground mount and carports**	STORAGE **Battery options available**
FUNDING **Buy, lease or solar as a service**	LOOKED AFTER **Design, install and maintenance**	FIRST STEP **Usage and site assessed**

WHAT YOU GET

System design
Sized to your usage, roof and goals, with savings and payback set out.

Battery storage
Store what you generate and use it when you need it.

Performance monitoring
See what your system generates and how much you save.

Installation
Design, procurement, installation and commissioning managed for you.

Use it or export it
Power your buildings first, and export any surplus to the grid.

Maintenance and warranties
Ongoing support to keep your system performing for decades.

FUNDING OPTIONS

Buy outright
Pay upfront and own the system and everything it generates.

Solar as a service
No upfront cost. Pay a fixed rate only for the power the system generates.

Lease or finance
Fixed payments over an agreed term, offset by your savings from day one.

We compare them for you
Costs, savings and payback for each option, side by side.

FREQUENTLY ASKED QUESTIONS

Your questions answered

Is our site suitable?
Most roofs and many open spaces can work. We assess your roof or land, orientation and usage first.

How much will we save?
It depends on your site, system and usage. Your proposal sets out savings and payback clearly.

Can we get solar with no upfront cost?
Yes. With solar as a service you pay only for the power the system generates.

What happens to power we don't use?
It can be stored in batteries or exported to the grid.

How long do panels last?
Commercial panels are built to last for decades with regular maintenance.

Is installation disruptive?
Installation is planned around your business to keep disruption low.

Does solar help with net zero?
Yes. Generating your own renewable power cuts the carbon from the electricity you buy.

How do we get started?
Upload your latest electricity bill, email us or book a call.
