Kee BUSINESS SERVICES

PRODUCT SHEET

Cyber Security

Understand what you need, compare cyber security suppliers and ask the right questions before you commit.

WHY IT MATTERS

Keep your team working
When key systems go down, routine jobs stop. Plan for bookings, records and the tools your team relies on.

Look after customer data
Know who can access contact details, staff records and confidential files, and remove access when people leave.

Know your cover
Understand what your current IT or cyber contract actually covers in an incident.

Protect your money
Fake supplier invoices ask you to pay a new bank account. A simple call back check stops them.

Answer tender questions
Know what you have in place, who is responsible and what evidence you can give a customer or tender.

Spot the gaps
See what's missing before it becomes a problem.

WHERE TO START

Multi factor login
Do staff use it on email and key accounts?

Leavers and movers
Who removes access when someone leaves?

Backups
When did you last test a restore?

Reporting
Who do staff tell about a suspicious link?

Payments
How do you check a changed bank account?

Your contract
What's covered if something goes wrong?

CHOOSING A SUPPLIER

What's included
Support, monitoring, training and incident help, line by line.

Who does what
Where your responsibilities end and the supplier's begin.

What you'll pay
Set fees, extras and incident charges, with no surprises.

Contract terms
Length, notice periods and what happens at renewal.

Upload your current contract or quote: wkf.ms/4juXFfs · Help choosing the right supplier
