BUSINESS SERVICES

PROTECT YOUR BUSINESS

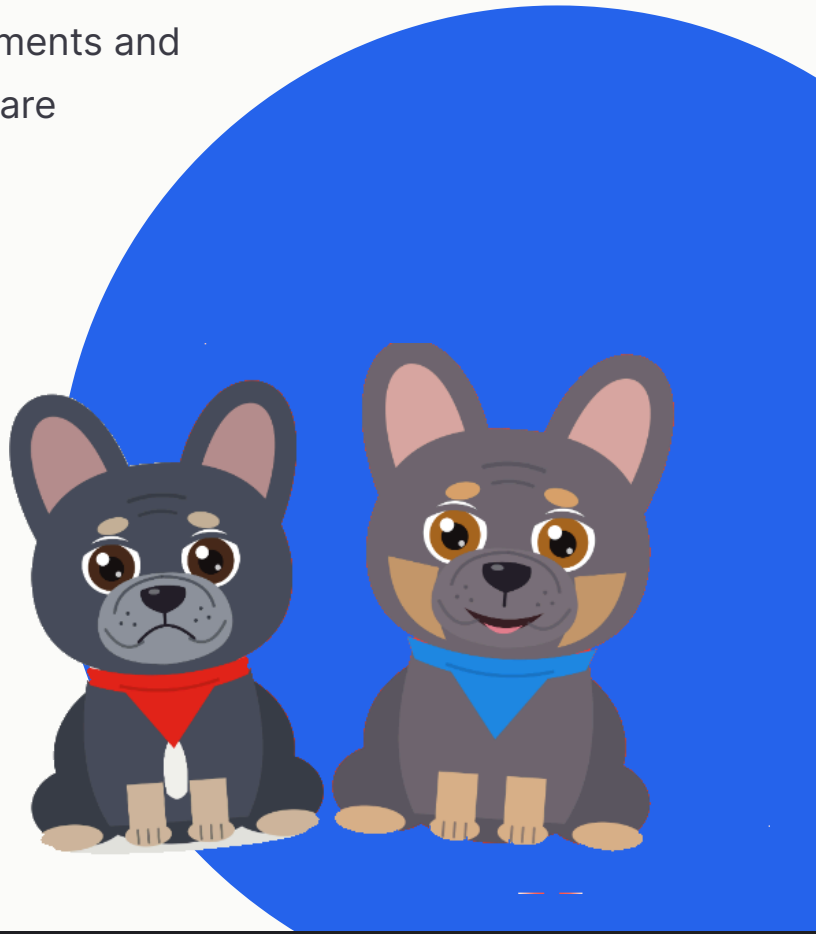

CHOOSE THE RIGHT PROTECTION

Cyber Security

If you lost email and files tomorrow, how long could you keep working?

Cyber security protects what your business relies on every day: email, files, payments and customer data. Kee helps you compare suppliers and choose well.

- **Understand** what you need to protect
- **Compare** suppliers like for like
- **Ask the right questions** before you sign

WHY IT MATTERS

One fake invoice or hacked inbox can stop a business.

Your team needs to access files, speak to customers and take payments. Your customers trust you with their information. A compromised email account or a convincing fake invoice can disrupt all of that, so it pays to know what protection you have and what you still need.

Professional services **Retail** **Healthcare** **Manufacturing** **Charities**

Needs first

We start with how your business works.

Clear comparisons

What each quote includes, side by side.

Honest advice

No pushing products you don't need.

WHERE TO START

Start with the systems your team couldn't work without, then ask:

Multi factor login
Do staff use it on email and key accounts?

Leavers and movers
Who removes access when someone leaves?

Backups
When did you last test a restore?

Reporting
Who do staff tell about a suspicious link?

Payments
How do you check a changed bank account?

Your contract
What's covered if something goes wrong?

WHY IT MATTERS

Four reasons to get it right.

Keep your team working

When key systems go down, routine jobs stop. Plan for bookings, records and the tools your team relies on.

Protect your money

Fake supplier invoices ask you to pay a new bank account. A simple call back check stops them.

Look after customer data

Know who can access contact details, staff records and confidential files, and remove access when people leave.

Answer tender questions

Know what you have in place, who is responsible and what evidence you can give a customer or tender.

Know your cover

Understand what your current IT or cyber contract actually covers in an incident.

Spot the gaps

See what's missing before it becomes a problem.

THE BASICS

Simple steps that make a real difference.

- Multi factor login
- Tested backups
- Access reviews
- Payment checks
- Staff awareness

CHOOSING A SUPPLIER

Cyber security quotes are hard to compare.

One quote may include day to day support, while another charges separately for help during an incident. We help you see what's included, where responsibilities sit and what you'll pay before you sign.

What's included

Support, monitoring, training and incident help, line by line.

Who does what

Where your responsibilities end and the supplier's begin.

What you'll pay

Set fees, extras and incident charges, with no surprises.

Contract terms

Length, notice periods and what happens at renewal.

WHEREVER YOU ARE

Reviewing, tendering or buying for the first time

Whether you're reviewing an existing contract, preparing for a tender or buying cyber security support for the first time, we start with how your business works and what you need to protect.

WHY USE KEE

We take the stress out of choosing a supplier.

One point of contact

A real person at Kee who knows your business.

Independent view

We help you compare suppliers fairly.

Plain English

No jargon, just what you need to know.

Ready for questions

Know your answers for customers and tenders.

HOW IT WORKS

1. **Tell us what you have**
   Your systems, current contract and concerns.
2. **We find the gaps**
   What you need to protect and what's missing.
3. **We compare options**
   Quotes side by side, in plain English.
4. **You choose**
   With the right questions answered first.

GETTING STARTED

Three easy ways to get started.

WHY KEE

One partner to help you choose well.

- **A real person** who knows your account, whenever you call.
- **Honest advice**, even when what you have is enough.
- **Clear comparisons**, so you know what you're paying for.
- **We take ownership**: if something's not right, we chase it until it is.
