Kee
BUSINESS SERVICES

FACT SHEET

Cyber Security

Kee helps you understand what your business needs from a cyber security supplier, compare your options and ask the right questions before you commit.

AT A GLANCE

WHAT WE DO	WE LOOK AT	WE COMPARE
Help you choose the right cyber security supplier	**Your systems, risks and current contract**	**What's included, responsibilities and cost**

GOOD FOR	APPROACH	SUPPORT
Reviews, tenders and first time buyers	**Plain English and no hard sell**	**A real person at Kee**

WHY IT MATTERS

Keep your team working
When key systems go down, routine jobs stop. Plan for bookings, records and the tools your team relies on.

Look after customer data
Know who can access contact details, staff records and confidential files, and remove access when people leave.

Know your cover
Understand what your current IT or cyber contract actually covers in an incident.

Protect your money
Fake supplier invoices ask you to pay a new bank account. A simple call back check stops them.

Answer tender questions
Know what you have in place, who is responsible and what evidence you can give a customer or tender.

Spot the gaps
See what's missing before it becomes a problem.

CHOOSING A SUPPLIER

What's included
Support, monitoring, training and incident help, line by line.

What you'll pay
Set fees, extras and incident charges, with no surprises.

Who does what
Where your responsibilities end and the supplier's begin.

Contract terms
Length, notice periods and what happens at renewal.

Let's have a proper chat

FREQUENTLY ASKED QUESTIONS

Your questions answered

Does Kee provide cyber security itself?
We help you understand your needs, compare suppliers and choose the right support for your business.

Where should we start?
With the systems your team couldn't work without, then check logins, access, backups and payment checks.

What is multi factor authentication?
A second check, like a code on your phone, when someone logs in. It stops many account takeovers.

How do fake invoice scams work?
A message that looks like a trusted supplier asks you to pay a new bank account. Always call back on a number you know.

Why are quotes hard to compare?
Some include day to day support, others charge extra for help during an incident. We lay them out side by side.

Can you help with a tender?
Yes. We help you understand what you have in place, who is responsible and what evidence you can provide.

We already have an IT company. Can you help?
Yes. We can review what your current contract covers and where the gaps are.

How do we get started?
Tell us what you have in place today and we'll help you work out what to ask for next.
