O2 · VODAFONE · EE · WHOLESALE

Business Mobiles

Every network. One team looking after it all.

We're not tied to one network, so we find the right plan for how your team actually uses their phones.

- **No preferred network**, just the right fit
- **Device management** and company Apple accounts
- **In house team** from start to finish

NO PREFERRED NETWORK

We pick the network around your business, not the other way round.

Mobiles are a crucial part of most businesses now. Because we work with O2, Vodafone, EE and wholesale airtime, we're never tied to one supplier. We compare them all and recommend the one that fits how your team works.

O2 · Vodafone · EE · Wholesale

We compare them all

Every major network, side by side, for your business.

Based on real use

Calls, data, travel and where your team works.

Honest advice

Even when the answer is the cheaper option.

HOW DOES YOUR TEAM USE THEIR MOBILES?

We build your plan around what matters to you:

Lots of calls
Unlimited UK minutes and good indoor signal at your office.

Heavy data use
A shared data pool so no one runs out, and 5G where you work.

Travel abroad
Roaming included or a daily bolt on, set up before you fly.

On the road or rural
The strongest signal on the routes and sites you use.

Working from a hotspot
Enough data for laptops too, with tethering allowed.

Lots of phones
Device management and company Apple accounts.

WHAT YOU GET

Everything you need from your business mobiles.

Every major network

O2, Vodafone, EE and wholesale airtime. We're not tied to one, so we pick what fits you.

Coverage checked first

We check signal at your office, your sites and where your team works before you sign.

The right handset deal

Handsets in the contract or bought separately, whichever is most cost effective for you.

Device management (MDM)

Manage every company phone from one place: set up, add apps, lock or wipe if lost.

Company Apple accounts

Phones held under the business, so they're never locked when someone leaves.

In house team

Roaming, upgrades, faults and billing, handled start to finish by our own team.

THE NETWORKS WE WORK WITH

One partner. Every major network.

O2 · Vodafone · EE · Wholesale

HANDSETS

Know what you're walking into before you sign.

We build the contract the most cost effective way for you, whether that's the handset inside the contract or bought separately. We show you the total cost of both over the contract, so you can compare like for like.

Handset in the contract

GOOD FOR

- Spreads the cost of new phones over the contract
- The latest handsets with no big upfront cost

WATCH OUT FOR

- A higher monthly cost for the whole term
- Paying for the phone even if you change plans

Handset bought separately

GOOD FOR

- Often cheaper overall, with a lower monthly tariff
- Keep phones you already own, or buy refurbished

WATCH OUT FOR

- Paying for handsets upfront
- Arranging repairs and replacements yourself

CHECK BEFORE YOU CHOOSE

Check the coverage where you work

Signal matters more than any tariff. Ofcom's independent checker shows every UK network by postcode, indoors and out. Check your office, your sites and your staff's homes, and we'll check them too.

checker.ofcom.org.uk

BEFORE YOU SIGN, WE CHECK

- **Coverage** at every site that matters
- **How your team uses** calls, data and roaming
- **Total handset cost** over the contract
- **Contract length** and what happens at the end
- **Keeping your numbers** when you move
- **Your current bill**, line by line

STAY IN CONTROL

Manage every phone, and keep them when people leave.

Mobile device management (MDM)

Manage all your company phones from one place. Set them up, add the apps your team needs, and lock or wipe a phone if it's lost or stolen.

Company Apple accounts

We set up your business's own Apple accounts, so every iPhone is held under the company. When someone leaves without handing over their iCloud details, you're not left with a locked handset.

LOOKED AFTER START TO FINISH

One in house team for everything.

No call centres and no chasing the network. Our own team handles it all.

Going on holiday
Roaming set up before you fly, so no bill shocks.

Upgrades
We plan upgrades with you and handle the swap.

Faults
Tell us once and we deal with the network.

Billing queries
A real person who knows your account sorts it out.

HOW WE SET YOUR PHONES UP

1. **Company Apple accounts**
We set up accounts that belong to your business.

2. **Phones enrolled**
Every phone is added to your device management.

3. **Ready to go**
Staff get phones set up with the apps they need.

4. **Easy handover**
When someone leaves, the phone is reset for the next person.

WHY KEE

One partner for all your business mobiles.

- **A real person** who knows your account, whenever you call.
- **No preferred network**, just the right one for you.
- **Honest advice**, even when the answer is the cheaper option.
- **We take ownership**: if something's not right, we chase it until it is.
