Kee BUSINESS SERVICES

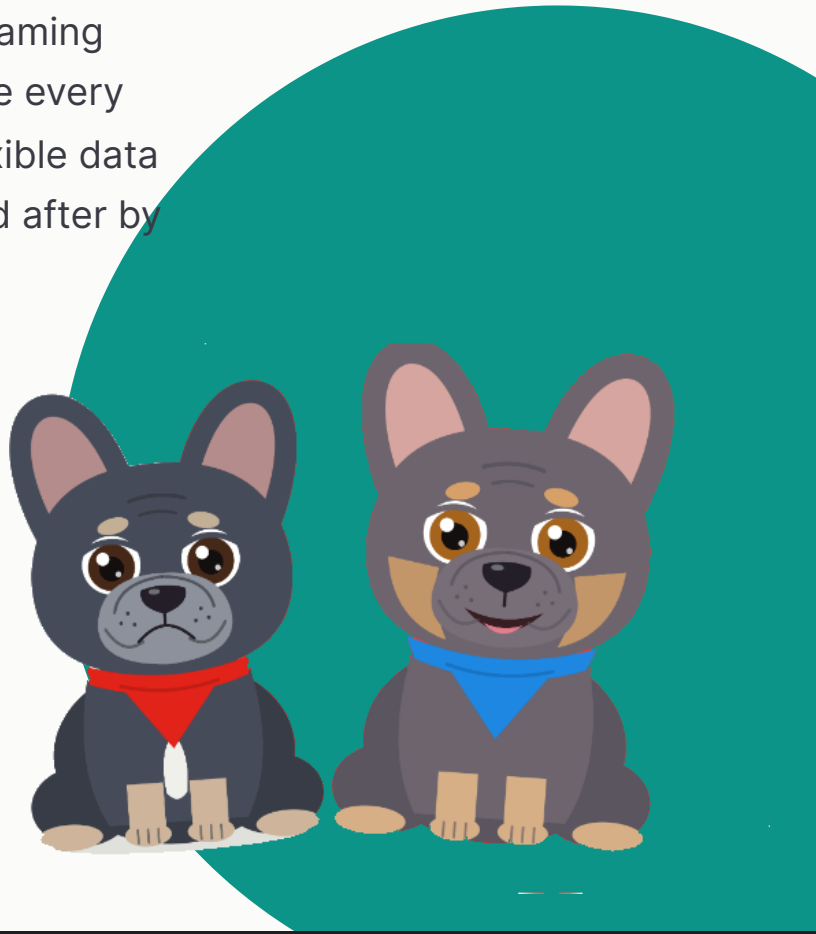

CONNECT EVERY DEVICE, EVERYWHERE

IoT SIM Cards

One SIM to keep every device connected.

Kee IoT SIM cards keep your card machines, trackers, sensors, alarms, CCTV and smart meters online, on one network or roaming across all four UK networks. Manage every SIM from one online portal, with flexible data plans and one bill, set up and looked after by Kee.

- **Multi network** across the UK
- **UK, Europe or global** coverage
- **One portal** and one bill for every SIM

WHY IOT SIMS

Your devices are only as good as their connection.

A card machine that drops signal loses sales. A tracker that goes dark loses a van. Kee IoT SIMs are built for devices, not phones, with multi network coverage, security locks and live monitoring, so your equipment stays online and you stay in control of costs.

Retail and hospitality | **Logistics and fleet** | **Construction** | **Smart buildings** | **Healthcare and telecare**

Needs first

We look at your devices and where they are.

Best coverage

Single or multi network, UK or worldwide.

Right plan

Pay as you use, bundles or shared data pools.

WHAT THEY CONNECT

Kee IoT SIMs keep all kinds of business devices online:

Card machines
Portable and countertop payment terminals.

Vehicle tracking
Fleet trackers, telematics and dash cams.

CCTV and alarms
Cameras, alarm panels and access control.

Smart meters
Energy, water and EV charging points.

Routers and backup
4G and 5G routers and failover links.

Signage and kiosks
Digital signs, lockers and vending.

WHAT YOU GET

Built for devices, not phones.

Multi network coverage

Roam across all four UK networks to the strongest signal, or choose a single network.

UK, Europe or global

Plans that cover the UK, Europe or worldwide, for devices that travel.

Every SIM size

Standard, micro and nano, rugged industrial SIMs and soldered eSIMs.

Remote eSIM switching

A removable eSIM that switches networks over the air, with no site visit.

Security built in

IMEI lock stops a SIM working if it's taken out of its device. Private APNs and fixed IPs available.

One online portal

Activate, monitor and manage every SIM, with usage alerts before costs creep up.

CONNECTIVITY

From tiny sensors to fast 5G routers.

2G · 4G · 5G · NB IoT · LTE M

FLEXIBLE DATA PLANS

Pay for data the way your devices use it.

Every estate is different, so choose the plan that fits how your devices use data. You only pay for a SIM from the day it's activated.

Pay as you use

No fixed bundle. Ideal when usage goes up and down.

Individual data plans

A set monthly bundle per SIM for predictable costs.

Static data pools

A fixed shared pool that any SIM in the pool can draw from.

Dynamic data pools

Every SIM adds to a shared pool, so unused data isn't wasted.

ONE PORTAL

Every SIM, one screen

Activate SIMs one at a time or in bulk, set alerts at the usage levels you choose, block or update a SIM in seconds and see live data, SMS and voice usage. All your networks come together on a single bill.

WHY USE KEE

Connectivity that's set up properly and looked after.

One point of contact

A real person at Kee for orders, changes and faults.

Coverage checked

We match networks to where your devices live.

No wasted data

We review usage and move SIMs to the right plan.

Easy to switch

We help move your devices from your current SIMs.

HOW IT WORKS

1. **Tell us about your devices**
   What they are, where they are and how much data they use.
2. **We recommend a plan**
   Network, coverage, SIM type and data plan.
3. **We send your SIMs**
   Activate when you're ready, with portal access.
4. **We look after it**
   Usage reviews, changes and support from Kee.

GETTING STARTED

Three easy ways to get started.

WHY KEE

One partner for every connected device.

- **A real person** who knows your account, whenever you call.
- **Honest advice** on networks, plans and SIM types.
- **One bill** for every network and every SIM.
- **We take ownership**: if something's not right, we chase it until it is.
