Kee
BUSINESS SERVICES

FACT SHEET

IoT SIM Cards

SIM cards built for business devices, with multi network coverage, flexible data plans and one portal to manage them, set up and looked after by Kee.

AT A GLANCE

WHAT IT IS	COVERAGE	CONNECTIVITY
SIM cards built for business devices	**Single or all four UK networks, Europe or global**	**2G, 4G, 5G, NB IoT and LTE M**

SIM TYPES	DATA PLANS	SUPPORT
Standard, industrial and eSIM	**Pay as you use, bundles or data pools**	**A real person at Kee**

WHAT YOU GET

Multi network coverage
Roam across all four UK networks to the strongest signal, or choose a single network.

Every SIM size
Standard, micro and nano, rugged industrial SIMs and soldered eSIMs.

Security built in
IMEI lock stops a SIM working if it's taken out of its device. Private APNs and fixed IPs available.

UK, Europe or global
Plans that cover the UK, Europe or worldwide, for devices that travel.

Remote eSIM switching
A removable eSIM that switches networks over the air, with no site visit.

One online portal
Activate, monitor and manage every SIM, with usage alerts before costs creep up.

FLEXIBLE DATA PLANS

Pay as you use
No fixed bundle. Ideal when usage goes up and down.

Static data pools
A fixed shared pool that any SIM in the pool can draw from.

Individual data plans
A set monthly bundle per SIM for predictable costs.

Dynamic data pools
Every SIM adds to a shared pool, so unused data isn't wasted.

FREQUENTLY ASKED QUESTIONS

Your questions answered

What is an IoT SIM?
A SIM card designed for devices like card machines, trackers, alarms and sensors rather than phones.

Which networks do they use?
A single UK network, or multi network SIMs that roam across all four UK networks to the strongest signal.

Do they work abroad?
Yes. Choose UK, Europe or global coverage for devices that travel or sit outside the UK.

Which SIM size do I need?
Standard, micro and nano SIMs, rugged industrial SIMs and soldered eSIMs are all available. We'll check your devices.

How is data charged?
Pay as you use, a set bundle per SIM, or a data pool shared across your SIMs.

Is it secure?
Yes. IMEI lock stops a SIM working in another device, and private APNs and fixed IPs are available.

When do I start paying?
Only from the day each SIM is activated.

How do we get started?
Upload your current SIM bill, send us your device list or book a call.
