BUSINESS SERVICES

BUSINESS CONNECTIVITY

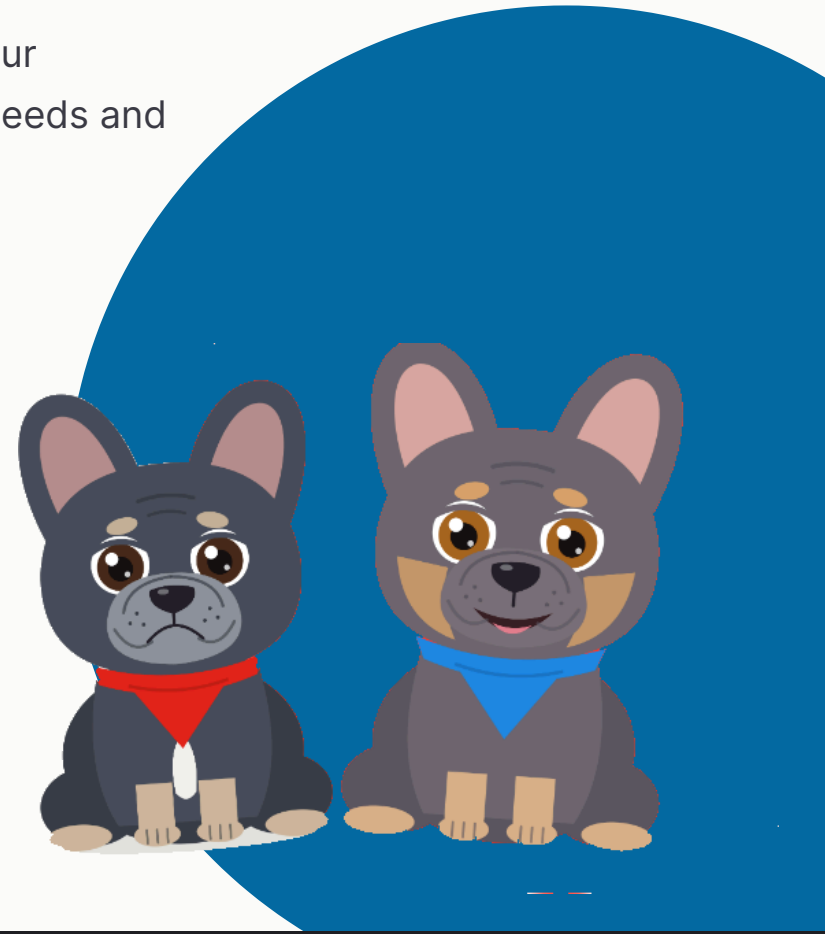
DEDICATED INTERNET

Leased Lines

Dedicated, guaranteed bandwidth for businesses that can't afford to slow down.

A private internet connection for your business alone, with guaranteed speeds and stronger service levels.

- **100 Mbps to 10 Gbps**
- **Guaranteed bandwidth**
- **Stronger service levels**



WHY A LEASED LINE

When broadband isn’t enough.

Broadband is shared with other users, so speeds can drop when you need them most. A leased line is a dedicated connection that is yours alone, with the same upload and download speed and stronger service levels if anything goes wrong. It gives you the bandwidth to run cloud systems, calls and video without slowing down, with room to grow.

Offices **Manufacturing** **Healthcare** **Education** **Retail** **Multi site**

Guaranteed speed

Bandwidth that is yours alone.

Same up and down

Upload as fast as you download.

Stronger service levels

Faster fixes if things go wrong.

WHO IT’S FOR

A leased line is a smart move if you:

Rely on the cloud
Systems, files and apps online.

Make lots of calls
Hosted phones and video meetings.

Have a busy office
Many staff on one connection.

Outgrow broadband
Need more than your site can get.

Can’t afford downtime
And need stronger service levels.

Share a building
And want a shared line option.

WHAT WE PROVIDE

Everything you need to get connected.

Dedicated leased lines

Uncontended circuits from 100 Mbps to 10 Gbps at most UK locations, sized to your business with room to grow.

Availability checks

We check exactly what can be delivered at your address before you commit.

Routers and firewalls

Faster speeds need faster equipment. We specify, supply and configure it so you get the full bandwidth.

Shared leased lines

One line split securely between several businesses in the same building, each kept private.

Backup connections

Broadband and 4G or 5G backup options to keep you online if your main line goes down.

Network and cabling

Network design, structured cabling and installation to get the speed to every desk.

SPEEDS

Sized to your business.

100 Mbps | 200 Mbps | 500 Mbps | 1 Gbps | 10 Gbps

LEASED LINE VS BROADBAND

What makes a leased line different?

Broadband is shared, so speeds can vary through the day and uploads are usually much slower than downloads. A leased line is dedicated to you, with guaranteed bandwidth, the same speed both ways and stronger service levels. It is the connection to choose when your business depends on being online.

Dedicated

Not shared with other users.

Symmetric

Same upload and download speed.

Service levels

Stronger than broadband.

Scalable

Room to grow as you do.

SHARED LEASED LINES

Share a building? Share a line

If several businesses share a building, one leased line can be split between them. Each business is securely kept apart for privacy and GDPR, so everyone gets the benefits of a leased line at a share of the cost.

WHY USE KEE

We make connectivity simple.

One point of contact

A real person at Kee who knows your business.

Honest advice

The right speed, not the biggest one.

Joined up

Alongside your phones, mobiles and more.

Managed for you

Install, equipment and renewals handled.

HOW IT WORKS

1. **Book a meeting**
   Tell us how you use the internet.
2. **Check**
   We confirm what your address can get.
3. **Recommend**
   The right speed and equipment.
4. **Connect**
   Installed, configured and supported.

GETTING STARTED

Three easy ways to get started.

Upload your current internet bill or contract
