BUSINESS SERVICES

IT NETWORKING

CONNECTED, EVERYWHERE

Networking and WiFi

Fast, reliable networks and WiFi that everything else in your business can depend on.

Network design, structured cabling, fibre and WiFi, installed properly and supported from the first cable.

- **Design and cabling**
- **WiFi inside and out**
- **Diagnose and fix**

WHY YOUR NETWORK MATTERS

The foundation of everything else.

Your computers, phones, CCTV, door entry and cloud systems all depend on your network. When cabling is old, WiFi has dead spots or the network was never designed properly, everything slows down. We design, install and fix networks so your business runs fast and reliably, whatever its size.

Offices **Warehouses** **Manufacturing** **Retail** **Hospitality** **Outdoor sites**

Fast

Networks built for speed.

Reliable

Designed and installed properly.

Ready to grow

Room for more users and devices.

WHO IT'S FOR

A network review is a smart move if you:

Have slow or patchy WiFi
Dead spots and dropouts.

Are moving or fitting out
A new office or site.

Have old cabling
Holding back faster systems.

Run a warehouse or yard
Need industrial or outdoor WiFi.

Have an IT team
And need a problem diagnosed.

Are adding a leased line
And need the speed at every desk.

WHAT WE PROVIDE

Every part of your network.

Network design

Networks planned around your building, your team and the systems you rely on, from 2 users to large sites.

Structured cabling

Cat5e, Cat6 and Cat6a cabling installed neatly and tested, ready for the speeds you need.

Fibre optic

Fibre installed between floors, buildings and cabinets, plus repairs and upgrades to existing fibre.

Business WiFi

WiFi for offices, warehouses, industrial sites and outdoor spaces, with coverage where you need it.

Diagnostics

Cable testing, fibre testing and troubleshooting to find out why your network is slow or unreliable.

Servers and cabinets

Server and comms cabinet installations, tidied, labelled and ready to support.

CABLING

Built to the right standard.

Cat5e · Cat6 · Cat6a · Fibre optic · Testing

WIFI

WiFi that works where you do.

Good WiFi is about more than a router in the corner. We plan coverage around your walls, floors and the number of people and devices you have, then install access points where they are needed. From a small office to a warehouse floor or an outdoor yard, you stay connected.

Offices

Coverage on every floor.

Warehouses

Industrial WiFi for big spaces.

Outdoor

Yards, car parks and grounds.

Busy spaces

Built for lots of devices.

DIAGNOSE AND FIX

Just need to know what's wrong?

If you have your own IT team, we can simply diagnose the problem with cable and fibre testing and tell them what to fix. Or we can diagnose it and give you a quote to fix it for you.

WHY USE KEE

We make networking simple.

One point of contact

A real person at Kee who knows your business.

Honest advice

What you need, not more.

Joined up

Alongside your internet, phones and more.

Supported

From the first cable onwards.

HOW IT WORKS

1. **Book a meeting**
   Tell us about your site and team.
2. **Survey**
   We look at your building and network.
3. **Design**
   The right cabling, fibre and WiFi.
4. **Install**
   Installed, tested and supported.

GETTING STARTED

Three easy ways to get started.
