PRODUCT SHEET

SIP Trunks

Flexible voice channels that replace ISDN, keep your numbers and connect your existing phone system to the phone network.

WHAT IT DOES

ISDN replacement
A proven, future proof replacement for ISDN lines, so you can move before the switch off without changing how you work.

Number portability
Keep your existing geographic and non geographic numbers, wherever you are, with new ranges available.

Fraud protection
Proactive monitoring and spend limits protect you from unexpected call charges.

Flexible channels
Increase or reduce the number of voice channels quickly to match seasonal peaks or growth.

Business continuity
Calls automatically reroute to another site or to mobiles in an emergency, so you never miss a call.

Call Manager
Optional call queuing, auto attendant, time of day routing and live call statistics from a simple portal.

WHO IT'S FOR

Still use ISDN
Lines that need replacing before the switch off.

Have a phone system
One you want to keep using.

Have busy seasons
Need more lines at peak times.

Run several sites
Each paying for its own ISDN.

Are moving office
Want to keep your numbers.

Use Microsoft Teams
Want proper calling through Teams.

WORKS WITH YOUR SYSTEM

IP phone systems
Works with all leading phone system brands.

Microsoft Teams
Calling in Teams through Direct Routing.

Your connection
Over broadband, Ethernet or a dedicated line.

Multi site
Fewer lines and central management.

Upload your current phone or ISDN bill: wkf.ms/4juXFfs · Move before the ISDN switch off
